Reviewer’s report

Title: Porous High-Density Polyethylene in Facial Reconstruction and Revision Rhinoplasty: A Prospective Cohort Study

Version: 3 Date: 23 March 2012

Reviewer: Seyed-Mohammad Fereshtehnejad

Reviewer’s report:

Dear editor of journal of Head & Face Medicine;

I re-evaluated the manuscript titled: “Porous High-Density Polyethylene in Facial Reconstruction and Revision Rhinoplasty: A Prospective Cohort Study”. The authors have properly answered the questions and quality of the paper has been considerably improved. However, there are some minor points to be taken into account:

1. Is patients’ satisfaction evaluated using a standardized questionnaire, or only based on self-reports of the patients? Please more clarify this important aspect of the study.

2. The language needs to be revised by an English professional editor

In my opinion, the manuscript needs minor revision to be considered for publication.
