Reviewer’s report

Title: Prospective Blind Comparative clinical study of two point fixation of zygomatic complex fracture using wire and mini plates.

Version: 3 Date: 17 January 2012

Reviewer: Santosh Kumar Kumar Gudi

Reviewer’s report:

No revisions are necessary, well written, which carries important clinical aspect of trauma. It gives very important aspect of data collection and also preservation to predict the basic clinical research. It gives valuable insight into trauma management. It has compared two aspects of fracture fixation, and concluded with prospective study. Such sort of studies are required. Now a days its essential to have good records of past also, keeping research attitude in mind.
