Title: Current state of orthodontic patients under Bisphoshonate therapy

Version: 1 Date: 20 March 2013

Reviewer: Majeed Rana

Reviewer's report:

Comments to the authors:

The authors present the current state of orthodontic patients under Bisphosphonate therapy. Authors described review of literature for the orthodontic treatment of patients with BRONJ. The results of the review regarding the Keywords: „Bisphosphonate’ in combination with: orthodontic, orthodontic treatment, tooth movement concept“ is interesting and treatment methods seems feasible. Please desribe the Authors’ contributions detailed All authors made substantive intellectual contributions to the submitted manuscript, is not enough. Who was responsible for data collection, review, and so on. A clinical picture of one of your patient would be helpfull to understand the problem fort he readers. The review of English and changes should not take much time. I will be happy to recommend publication once they are in.

Level of interest: An article of importance in its field

Quality of written English: there are many grammatical errors that should be corrected by a native speaker. Statistical review: No, the manuscript does not need to be seen by a statistician.
