Reviewer’s report

Title: Esthesioneuroblastoma: One of the rare causes of proptosis

Version: 2 Date: 14 July 2013

Reviewer: Silviu Albu

Reviewer’s report:

The authors are to be commended on a nicely written report. I enjoyed reading it. However, it is essentially a nice example that reviews standard therapy and knowledge. Nevertheless, it add new information to the literature and provides clinical insights that are novel and could alter patient treatment. Thus the authors should be complimented on the manuscript.

Level of interest: An article of importance in its field
