Reviewer's report

Title: Primary care clinician preferences for working with a collaborative intervention team

Version: 2 Date: 7 March 2007

Reviewer: JoAnn Kirchner

Reviewer's report:

The authors have responded well to the reviewers concerns.

- Major Compulsory Revisions
  None

- Minor Essential Revisions
  1) The second sentence of the second paragraph in the results is confusing. The authors note that PCPs are "evenly split" for brief verses in depth discussions about patients as time permits, wanting to be alerted to and cosigning all intervention team notes (verses what alternative), and wanting nurses to be automatically included in all conversations (verses what alternative)?

- Discretionary Revisions
  None

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
