Reviewer’s report

Title: Explaining the effects of a randomised controlled trial to implement evidence-based diabetes care: a theory-based process evaluation.

Version: 2 Date: 24 October 2006

Reviewer: Dianne Parker

Reviewer’s report:

I have carefully re-read the revised manuscript, alongside the comments made by myself and the other reviewer. I am persuaded that our comments have been adequately dealt with, and am happy for this version of the paper to be published.

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
