Reviewer’s report:

It’s been a pleasure conducting a review of the revised manuscript. I am pleased to see the changes that have been made and they certainly enhance the flow and content of the manuscript. All the amendments that I requested have been addressed to my satisfaction. The manuscript is now much shorter and the messages that it contains are communicated much more clearly and concisely.

The document does need a proof read once all the tracked changes have been accepted or rejected as a few typing errors were noted but these may be due to the changes.

This manuscript does add to the implementation science knowledge and will assist others working with large national organisations to implement and disseminate knowledge translations activities.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
