Reviewer's report

**Title:** The e-Health Implementation Toolkit: Qualitative evaluation across four European countries

**Version:** 1  **Date:** 8 June 2011

**Reviewer:** Susan Hinder

**Reviewer's report:**

Excellent paper - good research methods and very clear explanations of what was done. A joy to read.

Discretionary revisions

1. provide an example page of the E-HIT to make it easier for the reader to visualise without having to go on to the UCL website

2. make it clearer in the abstract that there were criticisms of the toolkit rather than 'brushing over' these.

3. You say the majority would recommend the toolkit - I would be interested to know how many

**Level of interest:** An article of outstanding merit and interest in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
