Reviewer's report

**Title:** Clinicians' Perceptions of Organizational Readiness for Change in the Context of Clinical Information System Projects: Insights from Two Cross-Sectional Surveys

**Version:** 2  **Date:** 22 December 2010

**Reviewer:** Xiaolin Wei

**Reviewer's report:**

The authors' responses are generally satisfactory.

Minor Essential Revisions

1. P17, Psychometric Properties of the Measures

   “Next, based on the results of the reliability analysis (Cronbach alpha), three items out of 39 were removed from their respective measurement instruments.” It will be good to mention why three items out of 39 were removed.

2. Proofreading is needed;

Discretionary Revisions

1. Regarding the last limitation, i.e., clinicians' changing perceptions of organisational readiness, do not find this was transferred to the Conclusion section, as the authors responded.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
