Reviewer’s report

Title: Strategies for updating clinical practice guidelines: a systematic review

Version: 2 Date: 21 May 2012

Reviewer: kath wright

Reviewer’s report:

The sources searched are relevant to the question being investigated, and the search strategies are appropriate with no errors of search logic or spelling.

Minor Essential Revisions

The search interface used for the MEDLINE search should be given so that the strategy could be replicated if necessary. I think this is PubMED??

It is also good practice to show the numbers of records retrieved by each of the search statements i.e. Guideline*[ti] 5700

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
