Reviewer's report

Title: Developing theory-informed behaviour change interventions to implement evidence into practice: a systematic approach using the Theoretical Domains Framework

Version: 2 Date: 5 December 2011

Reviewer: Rebecca Lawton

Reviewer's report:

The authors have provided a detailed response to all the suggestions made by the reviewers and have modified the manuscript accordingly. The restructuring of this manuscript has addressed many of my original concerns about the clarity of the message. This article will prove invaluable to researchers and innovative practitioners who want to improve the quality, safety or efficiency of care through behaviour change.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
