Reviewer's report

**Title:** Clinical guidelines contribute to the health inequities experienced by individuals with intellectual disabilities

**Version:** 3  **Date:** 6 March 2012

**Reviewer:** Atle Fretheim

**Reviewer's report:**

Re-review of manuscript "Clinical guidelines contribute to the health inequities experienced by individuals with intellectual disabilities", Lindsay et al.

I was very satisfied with the effort made to improve the manuscript, and as far as I can see all my critical comments have been addressed in a thorough and good way.

I agree with the authors' comment with regards to publication channel: I think this will fit nicely in Implementation Science.

Regards,
Atle F.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
