**Reviewer's report**

**Title:** Measurement Properties of a Novel Survey to Assess Stages of Organizational Readiness for Evidence-Based Practice in Community-Level Prevention Programs

**Version:** 2  **Date:** 18 November 2011

**Reviewer:** Martin Lee

**Reviewer's report:**

Minor essential revisions

I don't see any major issues with the analyses performed. However, since the authors performed an SEM analysis, I wonder why they did not present a path diagram. That might be helpful. Can they be more specific about the latent variable(s) involved here?

Finally, please be careful about the spelling of "Cronbach".

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**

I declare that I have no competing interests.
