Reviewer’s report

Title: Implementation of evidence-based practice across medical, nursing, pharmacological and allied health professionals in a nationwide hospital setting

Version: 1 Date: 19 March 2013

Reviewer: Naohito Yamaguchi

Reviewer’s report:

The authors use the term "EBP implementation", but the definition of "EBP implementation" is not given clearly and explicitly. The authors should describe how the meaning of “EBP implementation” was given in the questionnaire or attached letter to the respondents.

If the definition of "EBP implementation" was not given explicitly to the respondents, the authors should describe the possibility that questionnaire answers were influenced by this vagueness.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
