Title: Understanding the Canadian Adult CT Head Rule Trial: Use of A Theoretical Domains Framework for process evaluation

Version: 4 Date: 7 November 2012

Reviewer: James Cane

Reviewer's report:

I am satisfied that the authors have responded to all the suggested revisions in my previous review.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I was involved in the development of the refined Theoretical Domains Framework and have an article in the TDF series this manuscript is intended for. I did not, however, take any part in the work included in this paper.
