Reviewer’s report

Title: Social Acceptability of Treatments for Adolescent Idiopathic Scoliosis: a cross-sectional study.

Version: 3 Date: 12 August 2006

Reviewer: Hans-Rudolf Weiss

Reviewer’s report:

General

As an editor in chief I would like to leave the decision up to the other two reviewers invited. I have already expressed my concerns, however it is indeed an interesting topic not yet addressed so much in international literature so far. Therefore I’d vote for acceptance.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
