Reviewer’s report

Title: The three-dimensional easy morphological (3-DEMO) classification of scoliosis - Part II. Repeatability

Version: 2 Date: 20 October 2006

Reviewer: Manuel Rigo

Reviewer’s report:

General

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

I am not able to decide now. First I need to understand the classification and to accept part I before I decide about this second part

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
