Reviewer’s report

Title: The three-dimensional easy morphological (3-DEMO) classification of scoliosis - Part II. Repeatability

Version: 3 Date: 16 December 2006

Reviewer: Manuel Rigo

Reviewer’s report:

General

- Some typographic errors.
- Even I wrote in my first report that the current paper did not need to be seen by a statistician allow me to change this point and recommend such a revision as I do not feel adequately qualified to assess the statistics in this specific paper.

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
