Reviewer's report

Title: Treatment of Thoracolumbar and Lumbar Curves with P.A.S.B. Brace for Idiopathic Scoliosis: assessment of results following the S.R.S. Commitee on Bracing and Nonoperative Management Standardization Criteria.

Version: 1 Date: 27 June 2009

Reviewer: Andre THEVENON

Reviewer's report:

1 The question is not new, but the brace is.
2 There is no control group. In such a study, we do not know if all the patients who fullfilled the inclusion criteria have been treated. What about the children who did not wear the brace?
3 It is a pity that we do not have any data in the sagittal plane.
