Reviewer's report

Title: Treatment of Thoracolumbar and Lumbar Curves with P.A.S.B. Brace for Idiopathic Scoliosis: assessment of results following the S.R.S. Commitee on Bracing and Nonoperative Management Standardization Criteria.

Version: 2 Date: 16 July 2009

Reviewer: Charles R d'Amato

Reviewer's report:

The authors have addressed all the important issues and concerns except reporting the compliance data the collected by interview. Although, this information may be subjective it would be still interesting. A comment about their findings, at least should be included.

I recommend publication with this minor change.

Charles d'Amato, M.D.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
