Reviewer's report

Title: Reversal of childhood idiopathic scoliosis in an adult, without surgery: a case report and literature review

Version: 7 Date: 24 November 2009

Reviewer: Manuel Rigo

Reviewer's report:

The authors have made a great job reporting the original data regarding the assessment of the Cobb angle but adding the reported initial and final Cobb angles by two independent doctors. The paper is now ready for publication in scoliosis without further revision.

Level of interest: An article of importance in its field
