Reviewer's report

Title: Treatment of scoliosis in patients affected with Prader-Willi syndrome using various different techniques

Version: 2 Date: 14 March 2010

Reviewer: Toru Maruyama

Reviewer's report:

Thank you for the words to my comments.

Discretionary Revisions
Case 4
"No lengthening was performed, as the growing rod technique would require, since it was not possible to reach an agreement with the patients' parents".
This sentence should be added.
Table 1, case4:
Postoperative Cobb angle seems to be that of the first surgery. It can be replaced by that of the final fusion surgery.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
I declare that I have no competing interests.
