Reviewer's report

Title: Surgical and conservative treatment of patients with congenital scoliosis: A search for long-term results

Version: 6 Date: 8 March 2011

Reviewer: Elias Vasiliadis

Reviewer's report:

The authors addressed all my previous comments and the revised paper can be published as it is.

I would suggest only two discretionary revisions.

1. In the second paragraph of the Results section, please add the reference numbers of the two studies with the mid-term results.

2. The papers which met the inclusion criteria and are analyzed in the Discussion section should be moved to the results section

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
