Reviewer's report

Title: Rubinstein-Taybi Syndrome with Scoliosis

Version: 4 Date: 24 August 2011

Reviewer: Manabu Ito

Reviewer's report:

Minor essential revisions:
The corrections were made by the authors according to the comments given by the reviewers. The revised version is almost satisfactory except English grammatical errors and unsophisticated sentences. I do strongly recommend the authors to ask a native English speaker for a proof reading so that this would become an article worthy of publishing.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Declaration of competing interests:

I declare that I have no competing interests’ above.
