Reviewer’s report

Title: Conservative treatment of idiopathic scoliosis according to FITS concept: presentation of the method and preliminary, short term radiological and clinical results based on SOSORT and SRS criteria.

Version: 5 Date: 9 November 2011

Reviewer: Mònica Villagrasa

Reviewer’s report:

Discretionary Revisions

1.- About the exposition of the data in the tables there is nothing to change, now it’s excellent.

2.- Just to correct some spelling mistakes:

Magnitude (at the end of p.7)

In scoliosis treatment, the most desirable outcome is correction of the primary... (p. 11)

(a sugestion is to replace IS by BEING in “is necessary to increase the sample in the future” (p. 24)

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
