Reviewer’s report

Title: Multidetector CT with 3-dimensional volume rendering in the evaluation of the spine in patients with Neurofibromatosis type 1; a retrospective review of 73 patients

Version: 2 Date: 16 August 2014

Reviewer: Toru Maruyama

Reviewer’s report:

I enjoyed reading the manuscript regarding the role of the MDCT and 3D CT in the evaluation of the NF-1 patients. The results and conclusions were very convincible but not new.

Minor Essential Revisions
In the results section: Seventy-three consecutive patients (53 female, 21 male) --- The number of the patients was incorrect.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
