Reviewer’s report

Title: Management approach for recurrent spontaneous pneumothorax in consecutive pregnancies based on clinical and radiographic findings

Version: 2 Date: 15 October 2006

Reviewer: Vipin Zamvar

Reviewer’s report:

General:
1) 

------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

1) Please provide references for the information given about radiation exposure in pregnancy.
2) Was talc or kaolin pleurodesis considered at the time of the surgical procedures? Are there any risks of using these agents in pregnancy?

------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable
