Reviewer's report

Title: A Simple Reproducible Method Of Preventing Lobar Torsion

Version: 1 Date: 8 April 2008

Reviewer: Vipin Zamvar

Reviewer's report:

The authors describe their experience with the use of Bioglue to secure the middle and lower lobes after a right upper lobectomy. Bioglue would be a more expensive alternative to a couple of silk sutures, but this method has not been described in literature.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
