Reviewer’s report

Title: A simple reproducible method of preventing lobar torsion

Version: 2 Date: 28 April 2008

Reviewer: Mohan Devbhandari

Reviewer’s report:

A similar method of fixation has been reported by Higashiayama and colleagues. It will be interesting to see what are the merits of one compared to other. I would recommend revision of manuscript with inclusion of this paper in the discussion.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
