Reviewer’s report

Title: Interventional Bronchoscopy for Benign Tracheobronchial Diseases under Cardiopulmonary Bypass Support: Case Reports and Literature Review

Version: 3 Date: 19 February 2008

Reviewer: James Andrew A Thorpe

Reviewer’s report:

Ronci Line 3 should be spelt rhonchi. To advocate CPB on the basis of one case is an exaggeration I would state that in difficult airway situations fem-fem CPB can be safely applied as in the one case described.
Acceptable report with minir corrections.
