Reviewer's report

Title: Subannular left ventricular pseudoaneurysm following mitral valve replacement

Version: 1 Date: 16 February 2008

Reviewer: Vipin Zamvar

Reviewer's report:

The authors describe a case of subannular left ventricular pseudoaneurysm following mitral valve replacement.

The investigations leading to the diagnosis are described. However, the patient concerned refused to have surgical correction.

For this article to be of benefit to the surgical community, the authors must include a description of the surgical techniques available to correct this anomaly.

What next?: Unable to decide on acceptance or rejection until the authors have responded to the major compulsory revisions

Level of interest: An article of limited interest

Quality of written English: Acceptable
