Reviewer's report

Title: Current role of surgery in Small Cell Lung Carcinoma

Version: 1 Date: 18 May 2009

Reviewer: Panagiotis Dedeilias

Reviewer's report:

In this paper the role of surgery along with other therapeutic options in the treatment of patients with small cell lung carcinoma is reviewed. The authors concluded that surgery is not only indicated at the stage I tumors but also in other stages of the disease not suitable for chemotherapy. This is well presented in the manuscript which also includes a valuable review of the literature.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
