Reviewer's report

Title: Pulmonary stenosis development and reduction of pulmonary arterial hypertension in atrioventricular septal defect

Version: 2 Date: 30 April 2009

Reviewer: LJ j Wagenaar

Reviewer's report:

This is an interesting case report, including an important message for cardiologists and surgeons involved in congenital cardiology.

Major Compulsory Revisions:
- None

Minor Essential Revisions
- Please indicate the treatments until surgery (for example the treatment that was stopped in 1987).
- Was the atrial part of the AVSD also closed during surgery?
- With which drug was the vasoreactivity tested?
- Figures 2 & 3: is the proximal pulmonary artery dilated (post-stenotic dilation)?

Discretionary Revisions
- An atrioventricular septal defect is usually abbreviated as AVSD

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published
