Reviewer's report

Title: Antiphospholipid syndrome; its implication in cardiovascular diseases

Version: 1 Date: 12 July 2010

Reviewer: FANY CHRONIDOU

Reviewer's report:

A well documented article in a field of cardiac surgery where the underlying individual pathophysiology can lead to devastating outcome.

Although it looks quite extended in bio-physiology for a clinical doctor, it gives a wide picture to look for answers and solutions when difficult post operative problems in coagulopathy are coming up.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
