Reviewer's report

Title: Long-term Result of Hybrid Procedure for an Extensive Thoracic Aortic Aneurysm in Takayasu Arteritis

Version: 1 Date: 25 March 2010

Reviewer: AKIHIKO TSUCHIDA

Reviewer's report:

The authors described a long-term result of hybrid procedure for an extensive thoracic aortic aneurysm in Takayasu Arteritis. Since little is known on this entity, the manuscript is of value to be published. However, minor revision is required.

Minor point:
The authors should explain the treatment of Type II endoleak, which is existing before and after surgery.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable
