Reviewer's report

Title: Long-term Result of Hybrid Procedure for an Extensive Thoracic Aortic Aneurysm in Takayasu Arteritis

Version: 2 Date: 16 April 2010

Reviewer: Go Watanabe

Reviewer's report:

This case report is almost well-written.

For the proximal landing zone, 5cm elephant trunk is not enough? And, I think you don't need to mention about the endoleak in Conclusion.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
