Reviewer's report

Title: Surgical Repair for Aortic Dissection Accompanying A Right-Sided Aortic Arch

Version: 1 Date: 25 March 2010

Reviewer: AKIHIKO TSUCHIDA

Reviewer's report:

The authors described the result of surgical repair for aortic dissection accompanying a right-sided aortic arch arteritis. This manuscript is of value to be published, however, minor revision is required.

Minor point:
1. The authors should explain the indication of surgery for this disease in the Discussion.
2. The authors should note whether or not they performed reconstruction of the intercostal artery.
3. The authors should explain the protective method of spinal cord.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable
