Reviewer's report:

I have read and reviewed the manuscript named “Right Coronary Artery Originating from Left Anterior Descending Artery; Case Report ” under the light of the current literature. This case report includes relevant positive and negative findings from history examination and investigations. I decided to accept this work without any revisions since this article has importance in its field. I also think that the writing of the article is acceptable and suitable for a scientific peer reviewed journal. My advice on publication is an acceptance without any revisions.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
