Reviewer's report

Title: Half of the patients with adenosquamous cell carcinoma of the lung have double cancer

Version: 1 Date: 28 August 2010

Reviewer: Iwao Mikami

Reviewer's report:

This study was retrospectively reviewed 13 patients underwent operation for ADSQ lung cancer. This tumor remains still unclear due to rare disease. They analyzed these statistically, and reported the correlation between ADSQ and coexistent double cancer and prognosis. This paper is an article of importance in this field. I think their paper is acceptable for publication in this journal.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
