Reviewer's report

Title: A huge hepatocellular metastatic tumor of the right atrium causing acute right heart failure: A case report.

Version: 1 Date: 11 April 2011

Reviewer: Timothy Sakellaridis

Reviewer's report:

I read carefully the article submitted for review in "Journal of Cardiothoracic Surgery". There are several articles describing metastatic hepatocellular cancer to the heart, but searching the pertinent literature I found none with no evidence of the primary tumor.

Major Compulsory Revisions: None

Minor Essential Revisions: None

Discretionary Revisions: A small introduction before the case presentation would be suitable

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Declaration of competing interests:
