Reviewer’s report

Title: Natural air leak test without submergence for spontaneous pneumothorax

Version: 1 Date: 22 October 2011

Reviewer: Kazuhiro Yanagihara

Reviewer’s report:

In this study by Uramoto et al., the authors present a new method to test for air-leakage by using a transparent film and compare their new method with classical method in perioperative complications.

Their new method is unique, simple and cost-effective.

Their idea is worth to accept on this journal, but they need English proofreading.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
