Reviewer's report

Title: Poland syndrom and recurrent pneumothorax: is there a connection?

Version: 1 Date: 3 February 2011

Reviewer: andony baddour

Reviewer's report:

Dear Editors,

thank you very much for the honour to review for your esteemed journal. This is a very interesting article regarding Poland's syndrome and the occurrence of bullous disease/ pneumothorax. Although two cases are not enough to definitively establish this correlation, the hypothesis is well presented, and prototype in medical literature. I therefore suggest the acceptance of the paper.

Kind regards,
