Title: Cardiac Reoperation in A Patient who previously Underwent Omentoplasty for Postoperative Mediastinitis: Case Report

Version: 3 Date: 20 January 2011

Reviewer: Mehmet Kaplan

Reviewer's report:

The authors report a case titled 'Cardiac Reoperation in A Patient who previously Underwent Omentoplasty for Postoperative Mediastinitis: Case Report'.

Omentoplasty is very important and vitally technique for postoperative mediastinitis.

I congratulate to the authors for their presentation.

Level of interest: An article of importance in its field

Quality of written English: Acceptable
