Reviewer's report

**Title:** Successful Surgical Excision of Primary Right Atrial Angiosarcoma.

**Version:** 1 **Date:** 26 January 2011

**Reviewer:** Gianclaudio Mecozzi

**Reviewer's report:**

I would like to congratulate the authors for this manuscript that is to my opinion well written and points out the attention of the reader on a topic not very common in our daily practice.

I have no Major Compulsory Revisions.

Minor Essential Revisions: it should be interesting to know if by the first presentation, five months before the diagnosis a TTE has been performed and if not why.

Discretionary Revisions: I would like to know if a postoperative treatment (chemotherapy and/or irradiation) has taken in consideration.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Declaration of competing interests:**

I declare that I have no competing interests
