Reviewer's report

**Title:** Recurrent pericardial effusion after cardiac surgery: The use of colchicine after recalcitrant conventional therapy.

**Version:** 1  **Date:** 11 May 2011

**Reviewer:** Andrea Zuffi

**Reviewer's report:**

Dear Editor,

I find the argument treated in the paper "Recurrent pericardial effusion after cardiac surgery: The use of colchicine after recalcitrant conventional therapy" by Luca Dainese and coll., of interest in Cardiac surgery and Cardiology fields. Recurrence of pericarditis in post-pericardiectionomy patients remains a therapeutic deal in cardiovascular medicine.

The article is writing in a good English without grammatical errors. Articles findings are correctly reported and pertinent with the subject.

I find this article without revision ready to be published in your journal.

best regards
Andrea Zuffi
