Reviewer’s report

Title: The successful introduction of an adapted form of the mini extra corporeal circulation used for cardiac surgery in an obese patient.

Version: 1 Date: 10 January 2012

Reviewer: Cesare Quarto

Reviewer’s report:

This is an interesting case report of a severely obese patient undergoing to an AVR using a MECC System.

In my opinion it is well written but i think that the schematic description of the circuit is difficult to understand and the figure 1 could be improved starting by a better description.
