Reviewer's report

Title: Ruptured hemiarch and descending thoracic aorta aneurysm: hybrid treatment

Version: 1 Date: 21 February 2012

Reviewer: Efthimios Avgerinos

Reviewer's report:

This is an interesting case report on a still controversial hybrid technique to treat aortic arch aneurysms. However it lacks a scientifically balanced and accurate discussion. There are significant literature omissions that need to be addressed and reviewed.

Alongside, the complete manuscript should be reviewed by a native English speaker.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited
