Reviewer’s report

Title: Left ventricular endocardial echinococcosis associated with multiple intracranial hydatid cysts.

Version: 1 Date: 5 March 2013

Reviewer: IMAD TABRY

Reviewer’s report:

Very interesting article on a not so uncommon disease in that part of the world. Is the author suggesting that the intracerebral cysts need only careful followup or are there plans to remove those cysts irrespective of associated symptomatology?

The article needs extensive editing of the english language before publication

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
