Reviewer's report

Title: Primary pleural squamous cell carcinoma misdiagnosed as localized mesothelioma: a case report and review of the literature

Version: 1 Date: 27 December 2012

Reviewer: RENYUAN LI

Reviewer's report:

Minor Essential Revisions:
spelling mistakes eg. 'partial pleura' on page 4.

Discretionary Revisions
The paper will be improved if the author can supply some photoes of the tumor during operation and/or after operation.
As the second operation was finished more than 1 year ago, can the author give us any follow-up information about the patient?
On discussion, several preoperative measurement for diagnosis are mentioned. As to this case, the misdiagnosis was made pathologically. So the discussion maybe should focus on pathology of SCC.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published
