Title: Cardiac papillary fibroelastoma: a retrospect of four cases

Version: 1 Date: 13 November 2012

Reviewer: Liao chongxian

Reviewer’s report:

Major Compulsory Revisions
None.

Minor Essential Revisions
1. This article is good except for some spelling mistakes. I have highlighted them in the attachment.
2. The author represented a patient who is believed to suffer from a congenital CPFE. So, compared with the cases that included infantnbefore., what is the major founding in this article?

Discretionary Revisions
1. I wonder the prognosis of the 4 patients, especially the neonate. Is there a possibility now to evaluate the clinical efficacy of your tumor resection that is along with a valve replacement?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published
